Voice AI Platform

Live API Integration Summary – Admin and Customer dashboards
Live backend: `https://aurlynn.nyxtry.in`

1. Test the application

Admin dashboard

URL: https://voice-agent-3-0-git-main-athulmks-projects.vercel.app/admin/login
Email: **admin@voiceai.dev**
Password: **iYDWXinBUkZifyJF262T**

Customer dashboard

URL: https://voice-agent-3-0-git-main-athulmks-projects.vercel.app/login
Email: **owner@acme.test**
Password: **ChangeMe123!**

2. Admin side – live APIs integrated

Section	What is integrated (live data)
Authentication	Admin login, session refresh and logout. The admin profile and permissions load after sign-in and control which menu items and buttons are shown.
Customers	Customer list and customer detail pages. Settings can be read and saved. Custom domains can be added and verified. Each customer's staff list is shown.
Permissions, Roles & Staff	Full permission list, role management and platform staff accounts (create, edit, remove).
Plans & Packages	View all plans and create new ones.
Subscription & Billing	Each customer's current subscription and its history, invoices and invoice detail, and usage. A customer with no plan shows "No plan assigned".
Phone numbers	The shared number pool, plus the numbers assigned to each customer.
LLM provider catalog	The list of AI model providers that can be enabled for customers.
Agent templates	New admin page: list the agent templates and create new ones.

3. Customer side – live APIs integrated

Section	What is integrated (live data)

Authentication & account	Login, logout, profile, company settings, change password (new session is kept active), accept a staff invite, forgot and reset password, sign-up and email verification pages.
Team (Staff & Roles)	Permissions, roles and staff list. Staff can be created with a password or invited by link. The invite link is shown with a copy button and can be re-sent. Invalid roles show a clear error.
Billing	Plans, current subscription, usage, invoices and payment methods. "No plan assigned" is shown when the company has no plan.
Agents	List, open, create, duplicate, export, import, pause, resume and delete voice agents.
Agent builder	Browse templates, create an agent from a template, or describe the agent in words and have a draft generated.
Agent editor tabs	Persona, conversation flow, variables, rules, behaviour, analysis, outcomes, compliance, voice, keywords, languages, model and settings. All load and save against the live API.
Publishing	Validate, publish, version history and rollback. "Unpublished changes" is detected by comparing the draft with the live version.
Agent chat test	Test an agent by text chat inside the editor.
Company profile	Company details, website import to pre-fill the profile, and company-wide pronunciation rules.
Catalog	Languages, voices and models (filtered by what the admin enabled), plus custom voices.
Calls & analytics	Call log, analytics summary and time-series charts, and the demo call simulator.
Phone numbers	The company's phone numbers and inbound number list.

Report date: October 2026. Status reflects the live development API at the time of testing.
